

THE BEST FLY SCREENS AVAILABLE IN THE UK

Our Fly Screens are the BEST in the UK for Bi-fold Doors, Corner Doors, French Doors, Multi-Pane Doors, Patio Doors, Sliding Doors and Slide & Stack Doors. They are made to measure, and provide a barrier to flying insects without stopping the flow of air.

WHAT IS A RETRACTABLE SCREEN?

Described simply, as the name implies, they retract. Best Fly Screens mesh concertinas into the frame. Best Fly Screens are mainly retrofitted and almost seamlessly blend into your door frame, making them hardly noticeable.

When opening, the mesh screen simply glides along in its rail, unfolding from the concertina closed position, allowing the fresh air in; it allows you to view the outside but protects you against flying insects or bugs entering your home.

How wide can a Best Fly Screen span?

Up to **5m (16.40 ft)** for a single opening screen and up to **10m (32.80 ft)** for a double opening screen.

OPEN the DOORS
Let the air in
– **NOT the flies!**

Let the Fresh Air In, NOT Flies, and Add Privacy...

Our Fly and Privacy Screens offer excellent protection from flying insects while bringing an effortless chic look to any room. With their powder-coated aluminium frames and stylish internal privacy screen, our screens look perfect in any setting.

FLY SCREEN HALF CLOSED

FLY SCREEN FULLY CLOSED

PRIVACY SCREEN HALF CLOSED

PRIVACY SCREEN FULLY CLOSED

2 IN 1 (FLY & PRIVACY) BOTH HALF CLOSED

NOISE REDUCTION
